# INDEX TO VOLUME 132

## Alphabetical Table of Contents of Authors

ALTMANN, STUART A. See A. H. WELSH
APPANAH, S. See P. S. ASHTON
ASHTON, P. S., T. J. GIVNISH, and S. APPANAH. Staggered flowering in the Dipterocarpaceae: new insights into floral induction and the evolution of mast fruiting in the aseasonal tropics, 44

BEATON, MARGARET J., and PAUL D. N. HEBERT. Geographical parthenogenesis and polyploidy in *Daphnia pulex*, 837
BIERZYCHUDEK, PAULETTE, and VINCENT ECKHART. Spatial segregation of the sexes of dioecious plants, 34
BLUM, MURRAY S. See DAVID L. PEARSON
BURGER, JOANNA, and R. T. ZAPPALORTI. Effects of incubation temperature on sex ratios in pine snakes: differential vulnerability of males and females, 492
BURLEY, NANCY. The differential-allocation hypothesis: an experimental test, 611

CASPER, BRENDA B. Evidence for selective embryo abortion in *Cryptantha flava*, 318
CATES, REX G. See JOHN D. HORNER
CHARLESWORTH, D. Evidence for pollen competition in plants and its relationship to progeny fitness: a comment, 298
CHARNOV, ERIC L., and DAVID W. STEPHENS. On the evolution of host selection in solitary parasitoids, 707
CONDIT, RICHARD, FRANK M. STEWART, and BRUCE R. LEVIN. The population biology of bacterial transposons: a priori conditions for maintenance as parasitic DNA, 129
CONNOLLY, M. S. See CAROL BECKER LYNCH
COOPER, WILLIAM S. See ROBERT H. KAPLAN
CURTSINGER, JAMES W., and I. LORRAINE HEISLER. A diploid "sexy son" model, 437

DAVIS, LYNETTE E. See ANDREW G. STEPHENSON
DIAMOND, JARED. See STUART L. PIMM
DICKMAN, C. R. Sex-ratio variation in response to interspecific competition, 289

ECKHART, VINCENT. See PAULETTE BIERZYCHUDEK
EHRLICH, PAUL R., and DARRYL WHEYE. Hilltopping checkerspot butterflies revisited, 460. See also SUSAN HARRISON
ENGEN, STEINAR, BERNT-ERIK SAETHER, and NILS CHR. STENSETH. The effect of competition on the ranking of food items, 629
ERLINGE, SAM, GÖRGEN GÖRANSSON, GÖRAN HÖGSTEDT, GÖRAN JANSSON, OLOF LIBERG, JON LOMAN, INGVAR N. NILSSON, TORBJÖRN VON SCHANTZ, and MAGNUS SYLVÉN. More thoughts on vertebrate predator regulation of prey, 148
ESHEL, ILAN, and UZI MOTRO. The three brothers' problem: kin selection with more than one potential helper. 1. The case of immediate help, 550. See also UZI MOTRO

FALES, HENRY M. See DAVID L. PEARSON
FARRELL, BRIAN. See CHARLES MITTER

GABRIEL, WILFRIED, and BERNHARD THOMAS. Vertical migration of zooplankton as an evolutionarily stable strategy, 199
GASTON, KEVIN J., and JOHN H. LAWTON. Patterns in body size, population dynamics, and regional distribution of bracken herbivores, 662
GIVNISH, T. J. See P. S. ASHTON
GONDA, E. See DAVID L. PEARSON
GÖRANSSON, GÖRGEN. See SAM ERLINGE
GOSZ, JAMES R. See JOHN D. HORNER
GRIFFITHS, C. L. See R. N. HUGHES
GUTSCHICK, VINCENT P., and FREDERIK W.

WIEGEL. Optimizing the canopy photosynthetic rate by patterns of investment in specific leaf mass, 67

HARRISON, SUSAN, DENNIS D. MURPHY, and PAUL R. EHRLICH. Distribution of the bay checkerspot butterfly, *Euphydryas editha bayensis*: evidence for a metapopulation model, 360

HARVEY, ALAN W. Sexual size dimorphism and fecundity in satyrid butterflies: a comment, 750

HARVEY, PAUL H. See MARK D. PAGEL

HAUSER, MARC D. Erratum. Variation in maternal responsiveness in free-ranging vervet monkeys: a response to infant mortality risk? 756

HEBERT, PAUL D. N. See MARGARET J. BEATON

HEDRICK, ANN V. Female choice and the heritability of attractive male traits: an empirical study, 267

HEISLER, I. LORRAINE. See JAMES W. CURTSINGER

HÖGSTEDT, GÖRAN. See SAM ERLINGE

HORNER, JOHN D., JAMES R. GOSZ, and REX G. CATES. The role of carbon-based plant secondary metabolites in decomposition in terrestrial ecosystems, 869

HUGHES, R. N., and C. L. GRIFFITHS. Self-thinning in barnacles and mussels: the geometry of packing, 484

JAMES, C. D. See S. R. MORTON

JANSSON, GÖRAN. See SAM ERLINGE

JOHN-ALDER, HENRY B., PETER J. MORIN, and SHARON LAWLER. Thermal physiology, phenology, and distribution of tree frogs, 506

JONES, H. LEE. See STUART L. PIMM

JONES, TAPPEY H. See DAVID L. PEARSON

KAPLAN, ROBERT H., and WILLIAM S. COOPER. On the evolution of coin-flipping plasticity: a response to McGinley, Temme, and Geber, 753

KATS, LEE B. See ANDREW SIH

KEEGAN-ROGERS, VALERIE, and R. JACK SCHULTZ. Sexual selection among clones of unisexual fish (*Poeciliopsis*: Poeciliidae): genetic factors and rare-female advantage, 846

KIRKPATRICK, MARK. Consistency in genetic models of the sexy son: reply to Curtsinger and Heisler, 609

LAUENROTH, W. K. See D. G. MILCHUNAS

LAWLER, SHARON. See HENRY B. JOHN-ALDER

LAWTON, JOHN H. See KEVIN J. GASTON

LEIMAR, OLOF. See BIRGITTA SILLÉN-TULLBERG

LEVIN, BRUCE R. See RICHARD CONDIT

LEVIN, DONALD A. Consequences of stochastic elements in plant migration, 643

———. The paternity pools of plants, 309

LIBERG, OLOF, and TORBJÖRN VON SCHANTZ. The Oedipus hypothesis: a reply to Marks and Redmond, 155. See also SAM ERLINGE

LIGHTBODY, JILL P., and PATRICK J. WEATHERHEAD. Female settling patterns and polygyny: tests of a neutral-mate-choice hypothesis, 20

LOEHLE, CRAIG, and JOSEPH H. K. PECHMANN. Evolution: the missing ingredient in systems ecology, 884

LOMAN, JON. See SAM ERLINGE

LYNCH, CAROL BECKER, D. S. SULZBACH, and M. S. CONNOLLY. Quantitative-genetic analysis of temperature regulation in *Mus domesticus*. IV. Pleiotropy and genotype-by-environment interactions, 521

MARTIN, THOMAS E. Nest placement: implications for selected life-history traits, with special reference to clutch size, 900

MCCAULEY, EDWARD, WILLIAM W. MURDOCH, and SUSAN WATSON. Simple models and variation in plankton densities among lakes, 383

MILCHUNAS, D. G., O. E. SALA, and W. K. LAUENROTH. A generalized model of the effects of grazing by large herbivores on grassland community structure, 87

MITTER, CHARLES, BRIAN FARRELL, and BRIAN WIEGMANN. The phylogenetic study of adaptive zones: has phytophagy promoted insect diversification? 107

MORAN, NANCY A. The evolution of host-plant alternation in aphids: evidence for specialization as a dead end, 681

MORIN, PETER J. See HENRY B. JOHN-ALDER

MORTON, S. R., and C. D. JAMES. The diversity and abundance of lizards in arid Australia: a new hypothesis, 237

MOTRO, UZI, and ILAN ESHEL. The three brothers' problem: kin selection with more than one potential helper. 2. The case of delayed help, 567. See also ILAN ESHEL
MUELLER, LAURENCE D. Density-dependent population growth and natural selection in food-limited environments: the *Drosophila* model, 786
MURDOCH, WILLIAM W. See EDWARD MCCAULEY
MURPHY, DENNIS D. See SUSAN HARRISON

NIEMELÄ, P. See J. TUOMI
NILSSON, INGVAR N. See SAM ERLINGE

ODENDAAL, F. J., P. TURCHIN, and F. R. STERMITZ. An incidental-effect hypothesis explaining aggregation of males in a population of *Euphydryas anicia*, 735

PACALA, STEPHEN W. Competitive equivalence: the coevolutionary consequences of sedentary habit, 576
PACKER, CRAIG, and LORE RUTTAN. The evolution of cooperative hunting, 159
PAGEL, MARK D., and PAUL H. HARVEY. The taxon-level problem in the evolution of mammalian brain size: facts and artifacts, 344
PARKER, MATTHEW A. Genetic uniformity and disease resistance in a clonal plant, 538
PEARSON, DAVID L., MURRAY S. BLUM, TAPPEY H. JONES, HENRY M. FALES, E. GONDA, and B. R. WITTE. Historical perspective and the interpretation of ecological patterns: defensive compounds of tiger beetles (Coleoptera: Cicindelidae), 404
PECHMANN, JOSEPH H. K. See CRAIG LOEHLE
PETERSON, A. TOWNSEND. See A. H. WELSH
PETRANKA, JAMES W. See ANDREW SIH
PIMM, STUART L., H. LEE JONES, and JARED DIAMOND. On the risk of extinction, 757
PROVENCHER, LOUIS, and WILLIAM VICKERY. Territoriality, vegetation complexity, and biological control: the case for spiders, 257
PULLIAM, H. RONALD. Sources, sinks, and population regulation, 652

RATNIEKS, FRANCIS L. W. Reproductive harmony via mutual policing by workers in eusocial Hymenoptera, 217
REEVE, JOHN D. Environmental variability, migration, and persistence in host-parasitoid systems, 810
ROUSI, M. See J. TUOMI
RUTTAN, LORE. See CRAIG PACKER

SAETHER, BERNT-ERIK. See STEINAR ENGEN
SAKALUK, SCOTT K., and ROBERT L. SMITH. Inheritance of male parental investment in an insect, 594
SALA, O. E. See D. G. MILCHUNAS
SCHLICHTING, CARL D. See ANDREW G. STEPHENSON
SCHULTZ, R. JACK. See VALERIE KEEGAN-ROGERS
SIH, ANDREW, JAMES W. PETRANKA, and LEE B. KATS. The dynamics of prey refuge use: a model and tests with sunfish and salamander larvae, 463
SILK, JOAN B. Maternal investment in captive bonnet macaques (*Macaca radiata*), 1
SILLÉN-TULLBERG, BIRGITTA, and OLOF LEIMAR. The evolution of gregariousness in distasteful insects as a defense against predators, 723
SIRÉN, S. See J. TUOMI
SMITH, ROBERT L. See SCOTT K. SAKALUK
STENSETH, NILS CHR. See STEINAR ENGEN
STEPHENS, DAVID W. See ERIC L. CHARNOV
STEPHENSON, ANDREW G., JAMES A. WINSOR, CARL D. SCHLICHTING, and LYNETTE E. DAVIS. Pollen competition, nonrandom fertilization, and progeny fitness: a reply to Charlesworth, 303
STERMITZ, F. R. See F. J. ODENDAAL
STEWART, FRANK M. See RICHARD CONDIT
SULZBACH, D. S. See CAROL BECKER LYNCH
SYLVÉN, MAGNUS. See SAM ERLINGE

TAYLOR, ANDREW D. Parasitoid competition and the dynamics of host-parasitoid models, 417
THOMAS, BERNHARD. See WILFRIED GABRIEL
TUOMI, J., P. NIEMELÄ, M. ROUSI, S. SIRÉN, and T. VUORISALO. Induced accumulation of foliage phenols in mountain birch: branch response to defoliation? 602
TURCHIN, P. See F. J. ODENDAAL

VAN BERKUM, FREDRICA H. Latitudinal patterns of the thermal sensitivity of sprint speed in lizards, 327
VICKERY, WILLIAM. See LOUIS PROVENCHER
VON SCHANTZ, TORBJÖRN. See SAM ERLINGE; OLOF LIBERG
VUORISALO, T. See J. TUOMI

WATSON, SUSAN. See EDWARD MCCAULEY
WEATHERHEAD, PATRICK J. See JILL P. LIGHTBODY
WELSH, A. H., A. TOWNSEND PETERSON, and STUART A. ALTMANN. The fallacy of averages, 277
WHEYE, DARRYL. See PAUL R. EHRLICH
WIEGEL, FREDERIK W. See VINCENT P. GUTSCHICK
WIEGMANN, BRIAN. See CHARLES MITTER
WINSOR, JAMES A. See ANDREW G. STEPHENSON
WITTE, B. R. See DAVID L. PEARSON

ZAPPALORTI, R. T. See JOANNA BURGER
ZEH, DAVID W., and JEANNE A. ZEH. Condition-dependent sex ornaments and field tests of sexual-selection theory, 454
ZEH, JEANNE A. See DAVID W. ZEH

## Alphabetical Table of Contents of Titles

Competitive equivalence: the coevolutionary consequences of sedentary habit. Stephen W. Pacala, 576
Condition-dependent sex ornaments and field tests of sexual-selection theory. David W. Zeh and Jeanne A. Zeh, 454
Consequences of stochastic elements in plant migration. Donald A. Levin, 643
Consistency in genetic models of the sexy son: reply to Curtsinger and Heisler. Mark Kirkpatrick, 609

Density-dependent population growth and natural selection in food-limited environments: the *Drosophila* model. Laurence D. Mueller, 786
The differential-allocation hypothesis: an experimental test. Nancy Burley, 611
A diploid "sexy son" model. James W. Curtsinger and I. Lorraine Heisler, 437
Distribution of the bay checkerspot butterfly, *Euphydryas editha bayensis*: evidence for a metapopulation model. Susan Harrison, Dennis D. Murphy, and Paul R. Ehrlich, 360
The diversity and abundance of lizards in arid Australia: a new hypothesis. S. R. Morton and C. D. James, 237
The dynamics of prey refuge use: a model and tests with sunfish and salamander larvae. Andrew Sih, James W. Petranka, and Lee B. Kats, 463

The effect of competition on the ranking of food items. Steinar Engen, Bernt-Erik Saether, and Nils Chr. Stenseth, 629
Effects of incubation temperature on sex ratios in pine snakes: differential vulnerability of males and females. Joanna Burger and R. T. Zappalorti, 492
Environmental variability, migration, and persistence in host-parasitoid systems. John D. Reeve, 810
Evidence for pollen competition in plants and its relationship to progeny fitness: a comment. D. Charlesworth, 298
Evidence for selective embryo abortion in *Cryptantha flava*. Brenda B. Casper, 318
Evolution: the missing ingredient in systems ecology. Craig Loehle and Joseph H. K. Pechmann, 884
The evolution of cooperative hunting. Craig Packer and Lore Ruttan, 159
The evolution of gregariousness in distasteful insects as a defense against predators. Birgitta Sillén-Tullberg and Olof Leimar, 723
The evolution of host-plant alternation in aphids: evidence for specialization as a dead end. Nancy A. Moran, 681

The fallacy of averages. A. H. Welsh, A. Townsend Peterson, and Stuart A. Altmann, 277

Female choice and the heritability of attractive male traits: an empirical study. Ann V. Hedrick, 267
Female settling patterns and polygyny: tests of a neutral-mate-choice hypothesis. Jill P. Lightbody and Patrick J. Weatherhead, 20

A generalized model of the effects of grazing by large herbivores on grassland community structure. D. G. Milchunas, O. E. Sala, and W. K. Lauenroth, 87
Genetic uniformity and disease resistance in a clonal plant. Matthew A. Parker, 538
Geographical parthenogenesis and polyploidy in *Daphnia pulex*. Margaret J. Beaton and Paul D. N. Hebert, 837

Hilltopping checkerspot butterflies revisited. Paul R. Ehrlich and Darryl Wheye, 460
Historical perspective and the interpretation of ecological patterns: defensive compounds of tiger beetles (Coleoptera: Cicindelidae). David L. Pearson, Murray S. Blum, Tappey H. Jones, Henry M. Fales, E. Gonda, and B. R. Witte, 404

An incidental-effect hypothesis explaining aggregation of males in a population of *Euphydryas anicia*. F. J. Odendaal, P. Turchin, and F. R. Stermitz, 735
Induced accumulation of foliage phenols in mountain birch: branch response to defoliation? J. Tuomi, P. Niemelä, M. Rousi, S. Sirén, and T. Vuorisalo, 602
Inheritance of male parental investment in an insect. Scott K. Sakaluk and Robert L. Smith, 594

Latitudinal patterns of the thermal sensitivity of sprint speed in lizards. Fredrica H. van Berkum, 327

Maternal investment in captive bonnet macaques (*Macaca radiata*). Joan B. Silk, 1
More thoughts on vertebrate predator regulation of prey. Sam Erlinge, Görgen Göransson, Göran Högstedt, Göran Jansson, Olof Liberg, Jon Loman, Ingvar N. Nilsson, Torbjörn von Schantz, and Magnus Sylvén, 148

Nest placement: implications for selected life-history traits, with special reference to clutch size. Thomas E. Martin, 900

The Oedipus hypothesis: a reply to Marks and Redmond. Olof Liberg and Torbjörn von Schantz, 155
On the evolution of coin-flipping plasticity: a response to McGinley, Temme, and Geber. Robert H. Kaplan and William S. Cooper, 753
On the evolution of host selection in solitary parasitoids. Eric L. Charnov and David W. Stephens, 707
On the risk of extinction. Stuart L. Pimm, H. Lee Jones, and Jared Diamond, 757
Optimizing the canopy photosynthetic rate by patterns of investment in specific leaf mass. Vincent P. Gutschick and Frederik W. Wiegel, 67

Parasitoid competition and the dynamics of host-parasitoid models. Andrew D. Taylor, 417
The paternity pools of plants. Donald A. Levin, 309
Patterns in body size, population dynamics, and regional distribution of bracken herbivores. Kevin J. Gaston and John H. Lawton, 662
The phylogenetic study of adaptive zones: has phytophagy promoted insect diversification? Charles Mitter, Brian Farrell, and Brian Wiegmann, 107
Pollen competition, nonrandom fertilization, and progeny fitness: a reply to Charlesworth. Andrew G. Stephenson, James A. Winsor, Carl D. Schlichting, and Lynette E. Davis, 303
The population biology of bacterial transposons: a priori conditions for maintenance as parasitic DNA. Richard Condit, Frank M. Stewart, and Bruce R. Levin, 129

Quantitative-genetic analysis of temperature regulation in *Mus domesticus*. IV. Pleiotropy and genotype-by-environment interactions. Carol Becker Lynch, D. S. Sulzbach, and M. S. Connolly, 521

Reproductive harmony via mutual policing by workers in eusocial Hymenoptera. Francis L. W. Ratnieks, 217
The role of carbon-based plant secondary metabolites in decomposition in terrestrial ecosystems. John D. Horner, James R. Gosz, and Rex G. Cates, 869

Self-thinning in barnacles and mussels: the geometry of packing. R. N. Hughes and C. L. Griffiths, 484
Sex-ratio variation in response to interspecific competition. C. R. Dickman, 289
Sexual selection among clones of unisexual fish (*Poeciliopsis*: Poeciliidae): genetic factors and rare-female advantage. Valerie Keegan-Rogers and R. Jack Schultz, 846
Sexual size dimorphism and fecundity in satyrid butterflies: a comment. Alan W. Harvey, 750
Simple models and variation in plankton densities among lakes. Edward McCauley, William W. Murdoch, and Susan Watson, 383
Sources, sinks, and population regulation. H. Ronald Pulliam, 652
Spatial segregation of the sexes of dioecious plants. Paulette Bierzychudek and Vincent Eckhart, 34
Staggered flowering in the Dipterocarpaceae: new insights into floral induction and the evolution of mast fruiting in the aseasonal tropics. P. S. Ashton, T. J. Givnish, and S. Appanah, 44

The taxon-level problem in the evolution of mammalian brain size: facts and artifacts. Mark D. Pagel and Paul H. Harvey, 344
Territoriality, vegetation complexity, and biological control: the case for spiders. Louis Provencher and William Vickery, 257
Thermal physiology, phenology, and distribution of tree frogs. Henry B. John-Alder, Peter J. Morin, and Sharon Lawler, 506
The three brothers' problem: kin selection with more than one potential helper. 1. The case of immediate help. Ilan Eshel and Uzi Motro, 550
The three brothers' problem: kin selection with more than one potential helper. 2. The case of delayed help. Uzi Motro and Ilan Eshel, 567

Variation in maternal responsiveness in free-ranging vervet monkeys: a response to infant mortality risk? (Erratum). Marc D. Hauser, 756
Vertical migration of zooplankton as an evolutionarily stable strategy. Wilfried Gabriel and Bernhard Thomas, 199
